<https://github.com/MAziz-0>

A Junior Full Stack Software Developer with a complementary background in the IT and Legal sector and experienced in working in a corporate setting heavily supporting an end-user base. Passionate for technology and writing code to create web applications that are reliable and user-friendly and enhance the user experience. Committed team member who has the proven ability to work and assist a team of professionals to perform and accomplish tasks and effectively track changes. Skilled in HTML, CSS, JavaScript, jQuery, Python, Flask & Django and eager to contribute to a tech environment and team. I'm dedicated and ready to develop software that is customized to meet a company's organizational needs, highlight their core competencies, and further their success. I am currently studying React to advance my studies into the tech field further.

- Providing guidance and advice to users on the user of hardware and applications

Project Work: Asset removal/ Windows 10 Rollout

SOFTWARE PROJECTS

TECHNOLOGIES USED: HTML, CSS, BOOTSTRAP

MY PORTFOLIO

My-Portfolio website was made to showcase my initial first experience in Frontend development. Using the Bootstrap framework alongside HTML and CSS, I made a minimalist and clean single scrolling web page that uses a dark theme

TECHNOLOGIES USED: HTML, CSS, JAVASCRIPT, JQUERY

NARUTO MEMORIES (CARD GAME)

A popular memory card game with a fanfare twist. I've utilised the above technologies to create an engaging game that is logic-based, I was able to delve into procedural programming using the JavaScript language.

TECHNOLOGIES USED: HTML, CSS, PYTHON, FLASK, MONGODB, HEROKU

NOTTREAL SOLICITORS WEBSITE

I have created a web application fit to showcase a faux solicitor's firm, Nottreal Solicitors which is inspired by the firms I have worked at in the past. Using my experience in the Legal sector. I've utilised the above technologies to create a responsive company website using Flask as the main framework; the main features included user authentication, a custom message board using CRUD functions. MongoDB was used to store data and the website was deployed via Heroku using Git.

TECHNOLOGIES USED: HTML, CSS, PYTHON, DJANGO, SQLITE3, POSTGRESQL, AWS & SDK

MERGE STORE (E-COMMERCE WEBSITE)

I have created a web application that showcases an e-commerce store that sells a curated collection of highly-rated tech. Tech websites inspire Merge Store. A full functional e-commerce website was created using Python/Django and multiple libraries imported; its main features include a products page, user authentication, shopping (adding to cart), Checkout system using the Stripe API, Customer reviews and a Contact Us page. Error feedback and Crud functionality is found throughout the website.

EDUCATION

DECEMBER 2021

PROFESSIONAL DIPLOMA, FULL-STACK SOFTWARE DEVELOPMENT, CODE INSTITUTE

Full-stack development course which included core languages such as HTML, CSS, JavaScript, Python with accompanying frameworks.

SEPTEMBER 2018

PROFESSIONAL DIPLOMA IN LAW & PRACTICE, UNIVERSITY OF WESTMINSTER

Level 3 Professional Diploma in Law, covering all areas of law, heavily focused on research and compiling information.

Current Self Study:

- React
- Machine Learning (Python)
- Adobe Suite

SKILLS

- Communication (Utilising MS Teams, Slack etc.)
- Problem solving (Previous experiences are heavily involved in troubleshooting)
- Team Player
- Technical literacy (HTML, CSS, JavaScript, Python)
- Attention to detail

ACTIVITIES

I have a few passions such as working out and trying to better my fitness, like most developers I love video games and grew up playing them and fascinated by the dev teams that created work (in my eyes) almost comparable to art. I enjoy everything PC related and have built and fixed a fair few of computers myself. At the moment I am very interested in the Cryptocurrency space and would like to learn some Solidity at some point to understand Decentralized contracts. I voluntarily help family, friends, associates with building websites as I get to experience catering my UX design towards their needs.
